## The standard FTUX onboarding flow, for when a user opts to sign up (or sign in).

## Simple Sign Up (No Taste Preference / Rich Onboarding)

When a user takes an action where sign in is required (likes a mix, favorites a track, etc), skip rich onboarding and just show auth.

## Just Taste Preference

Rich Onboarding

Just taste preference, for users who have already registered, are signed in, and haven't given us strong signals for music preference.
