## s3 & s4 - Search Filter Screen

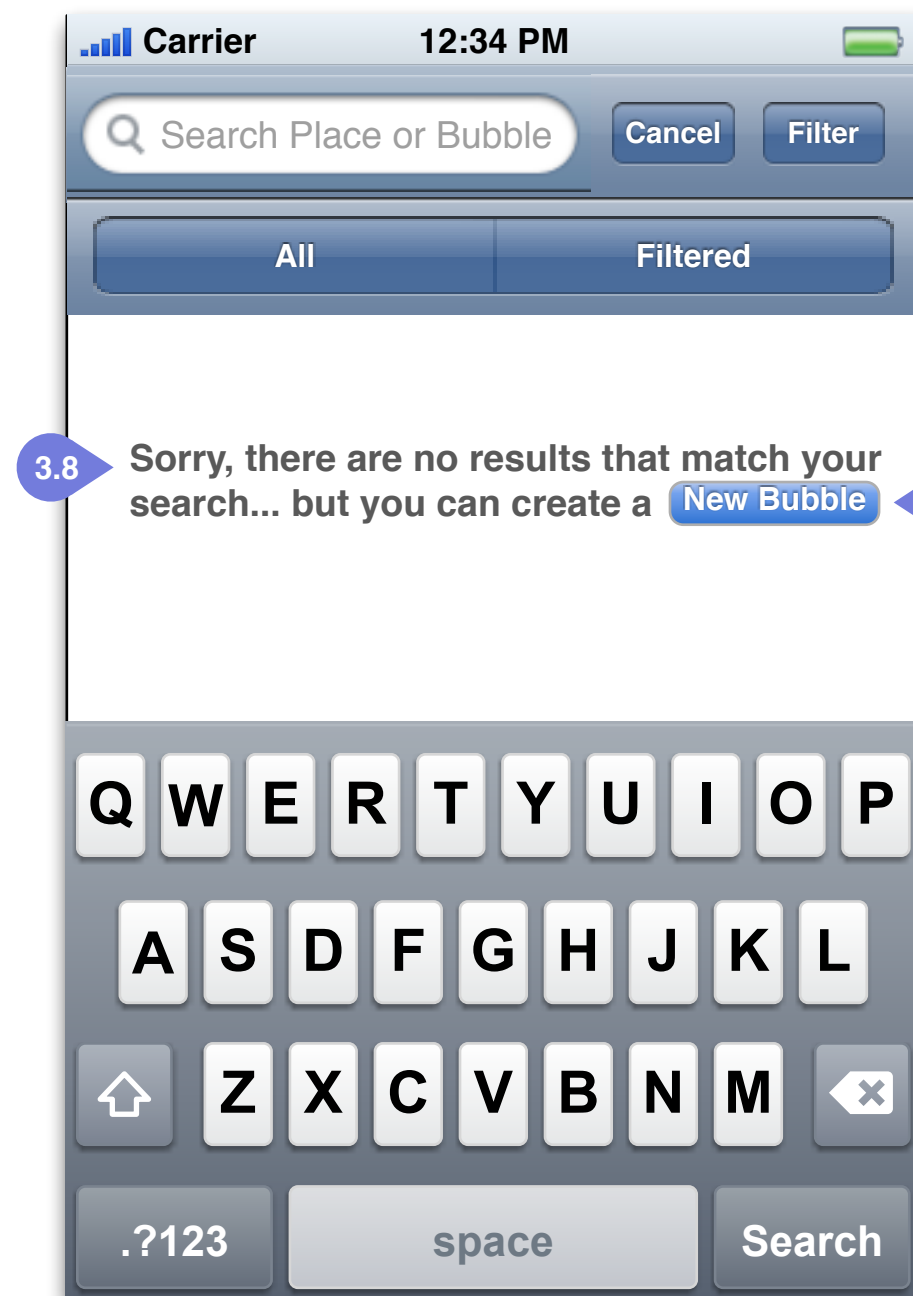

s3 - Search Screen

s4 - Search Filter

- **3.1 Search Field** - Field transitions from 1.4 to 3.1 upon user focus on field. User enters search criteria - Bubble name, creator and location are all searched for relevant results.
- **3.2 Cancel Button** - Takes the user back to previous screen.
- **3.3 Filter Button** - Displays Search Filter screen (s4).
- **3.4 Location Field** - Allows user to input the location for the search item.
- **3.6 Results Display**
- **3.7 Native Keyboard tray** - Search CTA.
- **4.1 Search Filter Title**
- **4.2 Cancel Button** - Returns user to previous Search screen.
- **4.3 Done** - Submit CTA.
- **4.4 Category filter** - "all" turns on all categories, "none" selects none and "selected" allows the user to custom-select categories from the list of 24.
- **4.5 Created By filter** - filters the results of who created the bubbles
- **4.6 Sort Results By** - Determines the way the results are displayed. Default and search results are by "Distance".
- **4.7 Timeline filter** - Draggable points to determine search criteria timeline.

## s3 - No Results

3.8

Sorry, there are no results that match your search... but you can create a **New Bubble**

3.9

3.10

Oh noes! We can't seem to connect to the internet. Please try again in a bit.

- 3.8 "No Results" Message - Messaging to let the user know there are  $\emptyset$  results.

- 3.9 New Bubble Button - Takes the user back to the New Bubble Flow(s30).

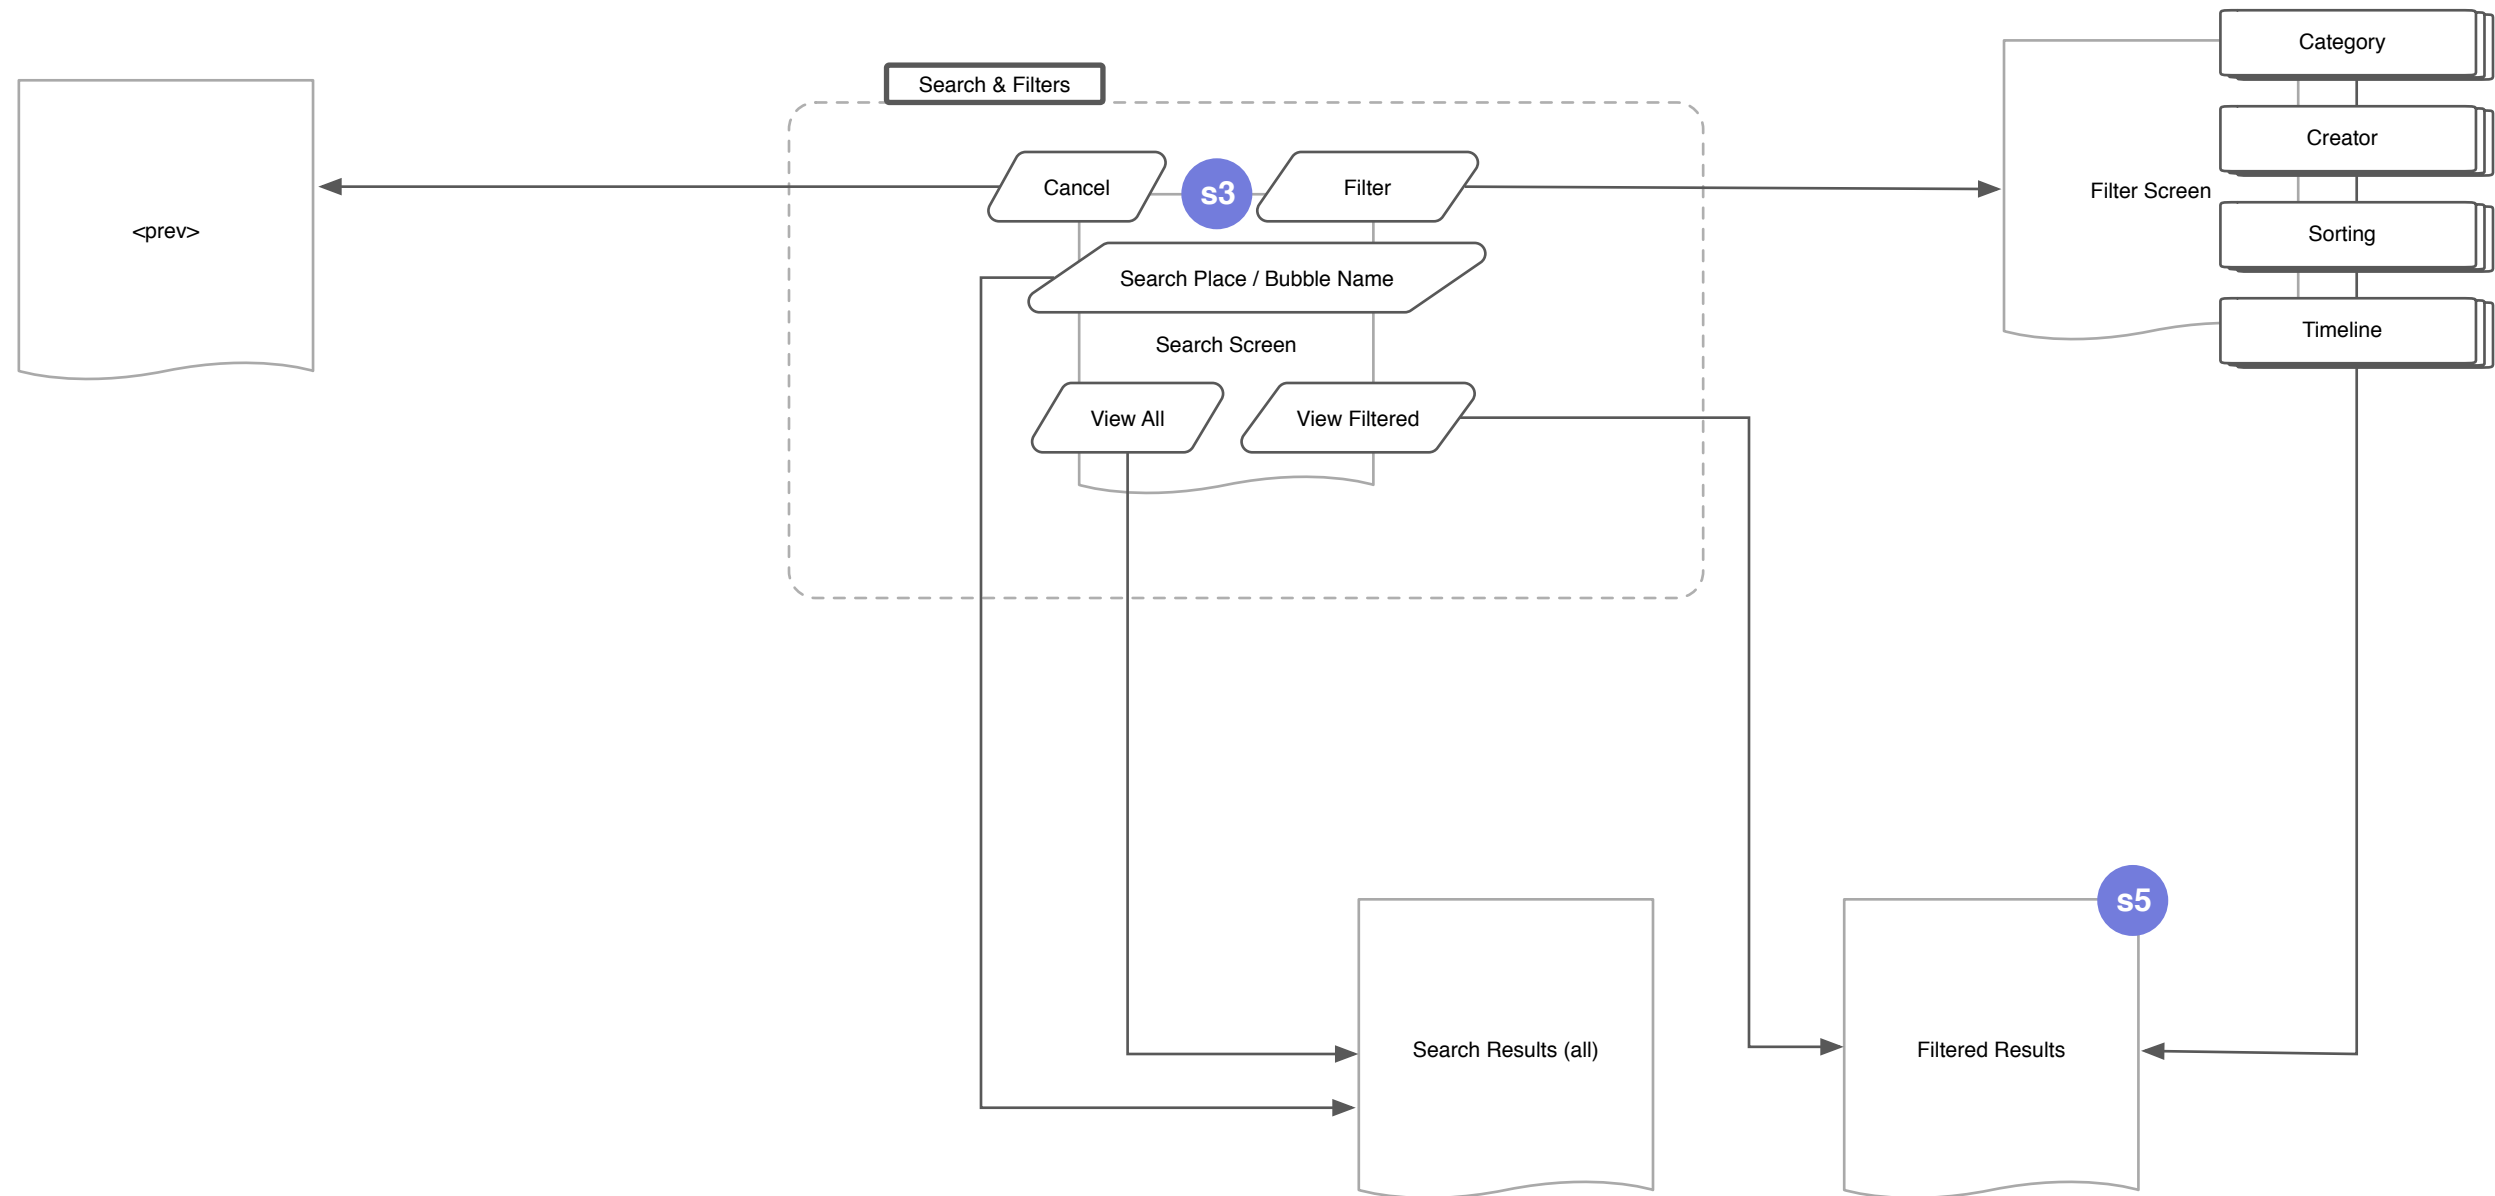

- 3.10 "No Data" error message - Messaging to tell the user there is no data.

s3 - Search Screen (results)
